Summary

Fresh graduate student [role?] with real-world experience across 2 companies (~6 months), including remote and on-site roles to approval at school. Motivated in open source software use cases at music industry, networking tools, browsers, ML/DL datasets, fine-tune and ERP (supply chain), familiar to Code AI IDE and willing to use AI model/AI automation services by paid to delivery. Familiar to git workflow and agile cycles to software, willing to teamwork and collaborate to productive at scale. Solid at TypeScript, Go and familiar at data structures and algorithms, networking, data, software design and engineering and cores.

Skills & Technologies

Programming Language: TypeScript, Go, PHP
Front-end: React.js, Vue.js, Nuxt.js, WordPress, TailwindCSS
Back-end: Laravel, Fiber/Gin, Express.js
API Development: REST, GraphQL
Databases: PostgreSQL, MongoDB, SQLite, Redis
Cloud: Supabase, AWS, Docker
Version Control: Git (rebase, cherry-pick, stash management)
Networking: L4-L3-L2, TCP/IP
Security: API security practices, legal and self-awareness
Operating System: Ubuntu, Linux familiar
Third party integration: TomTom Map free-tier service, CREDITS_NEEDED and API_KEY_SERVICE_NEEDED
Soft Skills: Problem-solving, teamwork, communication & critical thinking, Agile methodology, adaptability.

Professional Experience

Golive Dev JSC | Full-Stack Developer ***(Remote, Oct 2024 – Jan 2025)***

- Developed and optimized product modules, improving system efficiency.
- Led API integration and front-end development, reducing development time.
- Strengthened skills in Vue.js, Nuxt.js, and Git workflows.
- Collaborated with UI/UX designers to enhance user experience, aligning technical solutions with business goals.

Mevivu Co., Ltd | Web Developer ***(On-site, Aug 2023 – Nov 2023)***

- Maintained WordPress websites, increasing customer engagement.
- Proceed UI/UX prototypes in Figma, improving user experience.
- Created promotional videos, contributing to revenue growth.

Education

Ho Chi Minh City Open University
Bachelor of Information Technology (2020 - 2025)

- Major: Software Technology
- GPA: 3.0/4.0

Projects

Supply Chain Management System ***(Full-Stack Developer, Jul 2024 – Dec 2024)***

- Developed REST APIs and secured with OAuth 2.0 and UIs for shipment, order, and inventory tracking.
- Integrated real-time chat, notifications, and route tracking.
- Earned an **8/10** score for a thesis project on supply chain optimization.

q2p - Peer-to-Peer Blockchain Network ***(Go Developer, Dec 2024 – Jan 2025)***

- Built a decentralized P2P network, refining blockchain expertise.
- Applied AI agents (Cursor AI) for development effective

Personal Interests

- Passionate about technology, problem-solving, and continuous learning.
- Enthusiastic about hiking and exploring music genres, fostering creativity.
- Enjoys traveling to historic and culturally rich locations.
